The snow is falling outside the Oval Office windows in the year 2041, as the latest national crisis breaks out. The person sitting behind the Resolute Desk, however, goes by the name, Madame President Constance Higgins. This is a woman with a great deal of experience and not a whole lot of patience for people who try to disagree or go over and around the law. She has just had the mantle of President passed to her, and with it came an immense amount of garbage that her predecessor and their administration left behind. Now, here she is, sworn in as the fiftieth president, and about to head to her first cabinet meeting hoping for answers.

It is at this meeting that Madame President brings up many topics and speaks the absolute truth about all of them. Everything from the overpopulation of the U.S. because the southern borders were not secured by previous administrations to the higher number of people on Welfare, is addressed. From Social Security turning almost invisible as well as how the strength of the U.S. military has been cut in the last ten years in order to save money, makes everything even worse. It seems that the U.S. has received an ultimatum from the Chinese government: The Secretary General of the Communist Party of China, Zhang Li, insists that the U.S. pay their debts in gold rather than dollars, if what's currently overdue in interest payments is not taken care of within ninety days.

Secretary of Defense John Mahood feels that money is not what this is actually about. He believes there is something far worse going on. As the only one offering a helpful suggestion, he tells the President that since Zhang Li has given them ninety days to comply, they should not do so. If at that time the Chinese do not go forward with their threats about gold versus paper, then they have revealed something far worse is actually up their sleeves. Mahood is right in his assumption. What is being planned is a scheme of monumental proportions called Operation Dragon, where the U.S. will have to face another battle. Back in the 'real world,' Mike Dalton is the perfect male specimen. Not only is this guy a heartthrob for all the young ladies who call the Columbia University, NY, campus home, but he also just won the NCAA championship with his winning basket. Sean, Mike's younger brother, also loves his sibling but is envious of the attention he receives. Worse, he hates Mike for his relationship with Kyla MacGregor. A girl from Scotland, she is pre-med, highly intelligent, and equally as stunning as Mike.

When a family fight ensues that leaves the "golden" son to graduate top of his class and head into the U.S. military, the feeling of guilt at what happened with his brother goes with him.

So what does a patriot of the U.S. who has had an argument with his brother have to do with the

Chinese military moving into the U.S.? And who is NSA Agent Jim Hawkins, and what does he uncover about the Chinese government under a table through a trap door inside a restaurant in Chinatown? These answers cannot be given here, but you will simply note that this is one fast-paced, powerful story with questions galore.

The author has done a wonderful job keeping the thrills happening while telling the tale of brothers who are on an emotional path that may make going to war look like a walk in the park.

Quill says: Readers who love everything from history to war to family sagas that hit you directly in the heart, will find that this book answers each and every call.

TITLE INFORMATION

WHEN BROTHERS MEET

KIRKUS BOOK REVIEW

In 2041, the United States goes to war with China in Hardy's (The Place Where the Giant Fell, 2016, etc.) action-packed novel.

President Constance Higgins is in a quandary. After a socialist presidential administration, the country is \$32 trillion in debt, so the government is forced to seek financial aid from foreign nations. China demands repayment of its debt in gold, but Higgins refuses. Meanwhile, U.S. intelligence operatives intercept a strange transmission that mentions something called "Operation Dragon." At a summit, China and other powerful nations inform Higgins that all the country's debts will be cleared--if she gives them ownership of land in California that will enable them to take control of the world's oil supply. Soon, further chaos and war erupts. Another plot line involves brothers Mike and Sean Dalton, the sons of President Higgins' best friend, Maria. Mike puts Sean in the hospital in retaliation for upsetting his girlfriend, Kyla MacGregor, but then Sean escapes and disappears. Later, Kyla is drugged, raped, and impregnated by an intruder while Mike, a U.S. Army lieutenant, is away at war. As he fights for his own survival, he realizes that Sean's whereabouts might be closer than he assumed. This novel effectively encapsulates the difficulty of wartime, both for those on the front line and for the decision-makers in the government. Specifically, Hardy depicts the emotional bonds between people in crisis; for example, President Higgins and Secretary of Defense John Mahood are shown to be able to work together, despite their differing opinions.

An intense, sometimes-disturbing story about a disastrous American future.
